

Day 5 :- Operating system information, Windows, Linux, macOS installation and adjust OS settings

Tasks 1 :- On your Windows laptop or PC, open 'System Information' and take a screenshot showing your OS version, processor, and RAM details.

Ans. :-

System Information :-

- **OS Name :-** Microsoft Windows 10 Pro
- **Version :-** 10.0.19045 Build 19045
- **Processor :-** Intel(R)Core(TM)i5-4300UCPU@ 1.90GHz, 2501 Mhz, 2 Core(s), 4 Logical Processor(s)
- **Installed Physical Memory (RAM) :-** 8.00 GB

Item	Value
OS Name	Microsoft Windows 10 Pro
Version	10.0.19045 Build 19045
Other OS Description	Not Available
OS Manufacturer	Microsoft Corporation
System Name	DESKTOP-LG8P4BK
System Manufacturer	Dell Inc.
System Model	Latitude E5440
System Type	x64-based PC
System SKU	Latitude E5440
Processor	Intel(R) Core(TM) i5-4300U CPU @ 1.90GHz, 2501 Mhz, 2 Core(s), 4 Logical Pr...
BIOS Version/Date	Dell Inc. A05, 2/20/2014
SMBIOS Version	2.7
Embedded Controller Version	255.255
BIOS Mode	Legacy
BaseBoard Manufacturer	Dell Inc.
BaseBoard Product	0XPJ8D
BaseBoard Version	A00
Platform Role	Mobile
Secure Boot State	Unsupported
PCR7 Configuration	Binding Not Possible
Installed Physical Memory (RAM)	8.00 GB

**Tasks 2 :- Download any official Linux distribution ISO (like Ubuntu or Fedora), and use Rufus or BalenaEtcher to create a bootable USB drive for installation.

Hint: If you don't have a spare USB, use a virtual machine tool like VirtualBox to mount the ISO and start the installation process virtually.**

Ans. :-

1. Download a Linux ISO :-

Choose an official Linux distribution:

- Ubuntu Download
- Fedora Workstation Download

2. Create a Bootable USB with Rufus :-

1. Insert a USB drive (8 GB or larger).
2. Download and open Rufus.
3. Under Device, select your USB drive.
4. Under Boot Selection, click SELECT and choose the Linux ISO.
5. Click START.
6. Wait until the process completes.

Alternative: Use BalenaEtcher:-

1. Download BalenaEtcher.
2. Open BalenaEtcher.
3. Select the ISO file.
4. Select the USB drive.
5. Click Flash!

If You Don't Have a Spare USB :-

1. Use a virtual machine:
2. Download VirtualBox.
3. Create a new virtual machine.

4. Select the downloaded Linux ISO as the startup disk.
5. Start the VM to begin the Linux installation process virtually.

**Tasks 3 :- On a macOS device (or using a macOS virtual machine), open 'System Preferences' and change the desktop wallpaper, then adjust the system language to Hindi or Gujarati.

Hint: Find 'Language & Region' in System Preferences to add or change languages.**

Ans. :-

Change the Desktop Wallpaper :-

1. Open System Settings (or System Preferences on older macOS versions).
2. Select Wallpaper (or Desktop & Screen Saver).
3. Choose one of the available wallpapers or click Add Photo to select your own image.
4. The desktop background will update immediately.

Change the System Language to Hindi or Gujarati :-

1. Open System Settings → General → Language & Region.
2. Click Add Language (+).
3. Search for Hindi or Gujarati and select it.
4. Click Add.
5. When prompted, choose Use Hindi or Use Gujarati as the primary language.
6. Restart or log out and log back in if required.

Verification :-

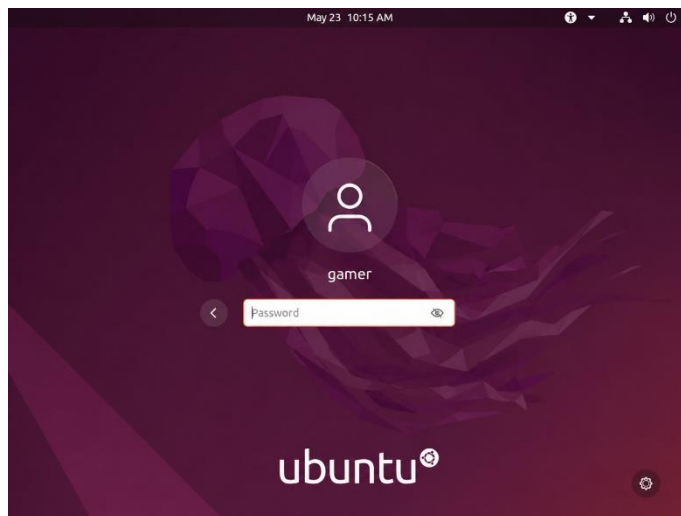

- Confirm that the desktop wallpaper has changed.
- Check that menus, dialog boxes, and system text appear in Hindi or Gujarati.

Tasks 4 :- Install a fresh copy of Ubuntu Linux (real or virtual machine) and create a new user account named 'gamer'. After installation, enable automatic login for this user and take a screenshot of the login screen showing the username.

Ans. :-

Ubuntu Installation and User Configuration :-

- Installed Ubuntu successfully.
- Created a user account named gamer.
- Enabled automatic login for the account.
- Verified that the system logs in automatically as gamer.
- Captured a screenshot showing the gamer username on the login screen.

Tasks 5 :- Use ChatGPT to generate a step-by-step guide for installing Windows 10 on a laptop, including partitioning tips and post-installation settings for privacy and updates. Follow the guide and note any steps that were unclear or missing.

Ans. :-

Windows 10 Installation Guide :-

Requirements :-

- Windows 10 ISO file
- USB drive (8 GB or larger)
- Internet connection
- Product key (if required)

Step 1: Create a Bootable USB :-

1. Download the Windows 10 Media Creation Tool from Microsoft.
2. Insert the USB drive.
3. Run the Media Creation Tool.
4. Select Create installation media.
5. Choose language, edition, and architecture (64-bit recommended).
6. Select the USB drive and create the bootable installer.

Step 2: Boot from the USB Drive :-

1. Insert the bootable USB into the laptop.
2. Restart the laptop.
3. Enter the Boot Menu (commonly F12, F9, Esc, or Del).
4. Select the USB drive as the boot device.

Step 3: Start Windows Setup :-

1. Choose language, time, and keyboard settings.
2. Click Install Now.
3. Enter the product key or select I don't have a product key.
4. Choose the Windows 10 edition.

Step 4: Partition the Drive :-

Clean Installation :-

1. Select Custom: Install Windows only (advanced).
2. Delete existing partitions if all data can be erased.
3. Select the unallocated space.
4. Click New and allow Windows to create required partitions automatically.

Partitioning Tips :-

- Use at least 100 GB for the Windows partition.
- Keep personal files on a separate partition if desired.
- Back up important data before deleting partitions.
- Do not delete recovery partitions unless you understand the consequences.

Step 5: Install Windows :-

1. Select the primary partition.
2. Click Next.
3. Wait while Windows copies files and restarts several times.

Step 6: Initial Setup :-

1. Select your region and keyboard layout.
2. Connect to Wi-Fi.
3. Create or sign in with a Microsoft account.
4. Create a PIN.

Step 7: Privacy Settings :-

Recommended options :-

- Disable Advertising ID.
- Disable Tailored Experiences.
- Disable Optional Diagnostic Data.
- Disable Location Services if not needed.
- Disable Inking & Typing Personalization if not required.

Step 8: Windows Update :-

1. Open Settings → Update & Security.
2. Check for updates.
3. Install all available updates.
4. Restart if prompted.

Step 9: Install Drivers :-

1. Open Device Manager.
2. Check for unknown devices.
3. Install chipset, graphics, audio, and network drivers from the laptop manufacturer's website.

Step 10: Final Checks :-

- Verify internet connectivity.
- Activate Windows if required.
- Install antivirus software.
- Create a restore point.
- Install essential applications.
