

Day 3 : Peripheral Troubleshooting Theory : Common issues and solution for peripherals. Practical : Troubleshoot a non-working printer.

Tasks 1 :- List 5 common issues users face with USB keyboards or mice on laptops, and write one possible solution for each.

Ans. :-

Common Issues with USB Keyboards or Mice and Their Solutions :-

<i>Issue</i>	<i>Possible Solution</i>
1. Keyboard or mouse not detected by the laptop	Unplug the device and reconnect it to another USB port.
2. Device stops working intermittently	Check for loose connections and update USB drivers.
3. Keyboard keys not responding	Clean the keyboard and restart the laptop.
4. Mouse pointer not moving smoothly	Clean the mouse sensor and use a proper mouse pad.
5. USB device not recognized error message	Reinstall the device driver through Device Manager and reconnect the device.

Tasks 2 :- Simulate a troubleshooting flow: Your Bluetooth headphones are not connecting to your phone. Write the exact step-by-step actions you would take to diagnose and fix the issue, mentioning any settings or indicators you would check.

Ans :-

Troubleshooting Flow: Bluetooth Headphones Not Connecting to a Phone :-

1. Turn on the headphones and check the LED indicator.
2. Make sure Bluetooth is enabled on the phone.
3. Put the headphones in pairing mode (flashing blue/red light).
4. Go to Settings → Bluetooth and search for devices.

5. Select the headphone name and tap Connect.
6. If it fails, choose Forget Device and pair again.
7. Check that the headphones have enough battery charge.
8. Restart both the phone and headphones.
9. Move closer to the phone and avoid interference.
10. Reset the headphones if they still do not connect.

Indicators to Check :-

- **Headphone LED:** Power status and pairing mode.
- **Bluetooth Icon on Phone:** Confirms Bluetooth is enabled.
- **Device Status:** Shows "Available," "Paired," or "Connected."
- **Battery Level:** Sufficient charge on both devices.

**Tasks 3 :- A user reports that their external webcam is not detected during a Zoom call on Windows 10. Write a checklist of 6 things to check or try to resolve the problem.

Hint: Consider device manager, privacy settings, and app permissions.**

Ans. :-

Webcam Not Detected in Zoom (Windows 10) – Checklist :-

- 1. Check USB Connection**
 - Unplug and reconnect the webcam or try a different USB port.
- 2. Check Device Manager**
 - Open Device Manager → Cameras and verify the webcam is listed and enabled.
- 3. Check Camera Privacy Settings**
 - Go to Settings → Privacy → Camera and ensure camera access is turned on.
- 4. Check Zoom Permissions**
 - In Zoom, go to Settings → Video and select the correct webcam.
- 5. Update/Reinstall Drivers**

- Update the webcam driver through Device Manager or reinstall it.

6. Restart the Computer

- Restart Windows and open Zoom again to check if the webcam is detected.

Tasks 4 :- You are helping a friend whose printer is showing 'offline' status on their PC. Describe how you would use the Windows Troubleshooter tool to try to fix the issue, and explain what information the tool provides during the process.

Ans. :-

Using Windows Troubleshooter to Fix an Offline Printer :-

1. Click Start → Settings → Update & Security → Troubleshoot.
2. Select Additional Troubleshooters.
3. Click Printer and then Run the Troubleshooter.
4. Choose the printer that shows Offline status.
5. The troubleshooter will automatically check for common problems such as:
 - Printer connection issues
 - Incorrect printer settings
 - Driver problems
 - Print spooler service errors
 - Network connectivity issues (for wireless printers)
6. Follow any on-screen recommendations provided by the troubleshooter.
7. Apply the suggested fixes and restart the printer if prompted.
8. Check whether the printer status changes from Offline to Online.

Information Provided by the Troubleshooter :-

- The printer selected for diagnosis.
- Problems detected during the scan.
- Status of printer drivers and services.
- Suggested fixes or actions taken automatically.
